

PROFESSIONAL PROFILE

Web developer with solid experience in the **.NET** ecosystem, specializing in building modern and efficient applications using **Blazor** and **MudBlazor** as UI component frameworks. Extensive knowledge in full-stack service-oriented application design and implementation using **ASP.NET Core**, **Entity Framework Core**, and clean, scalable architectures.

Practical experience in deploying, integrating, and monitoring cloud-based solutions using Microsoft Azure, including **App Services**, **Azure SQL**, **Azure Functions**, **Azure DevOps**, and **Azure Active Directory** for authentication and access control.

Focused on code quality, best development practices (SOLID, DDD, Clean Architecture), automated testing, and version control with Git. Experienced in working within agile teams (Scrum/Kanban) and mission-critical projects with a focus on continuous improvement and continuous delivery (CI/CD).

WORK EXPERIENCE

DinoTech Consulting
Junior Software Engineer
2024–Present

- Successfully led research and implementation of cloud-based route optimization solutions, improving operational efficiency in logistics environments.
- Frontend development using Blazor and MudBlazor, creating modern, interactive, and user-centered interfaces.
- Actively involved in the design and implementation of database structures for web applications, ensuring scalability, performance, and proper system integration.

EDUCATION

2019	International Baccalaureate Diploma Yorkin School
2024-Hoy	Bachelor’s in Software Engineering Universidad Cenfotec

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Microsoft — 2025
Credential ID: 921A6469DDC58716

LANGUAGES

Spanish: Native
English: Advanced

TECHNICAL SKILLS
